Check Point vSEC 4 AZURE „HANDS-ON“

Nils Schäfer
Security Engineer

Check Point®
SOFTWARE TECHNOLOGIES LTD.

**HYBRID CLOUD ALLOWS IT
TO DELIVER APPLICATIONS
IN A FRACTION OF COST AND TIME!**

Check Point®
SOFTWARE TECHNOLOGIES LTD.

**LEGACY SECURITY IS A SHOWSTOPPER,
AND DOESN'T PROTECT APPLICATIONS FROM
MODERN THREATS**

SECURITY IN THE HYBRID CLOUD....

-  Must prevent lateral move of threats between applications **and not only at the perimeter**
-  Should protect new IT services and applications in seconds **not in weeks**
-  Should automatically be provisioned and scale within the environment **without operational overhead**

Check Point[®]
SOFTWARE TECHNOLOGIES LTD.

INSTANTLY SECURE RAPIDLY-EVOLVING SERVICES
IN ALL HYBRID CLOUD ENVIRONMENTS
WITH PAY-AS-YOU-GO VIRTUAL SECURITY

SECURE YOUR MODERN DATACENTER WITH AUTOMATION AND TIGHT SECURITY BETWEEN APPLICATIONS

Check Point®
SOFTWARE TECHNOLOGIES LTD.

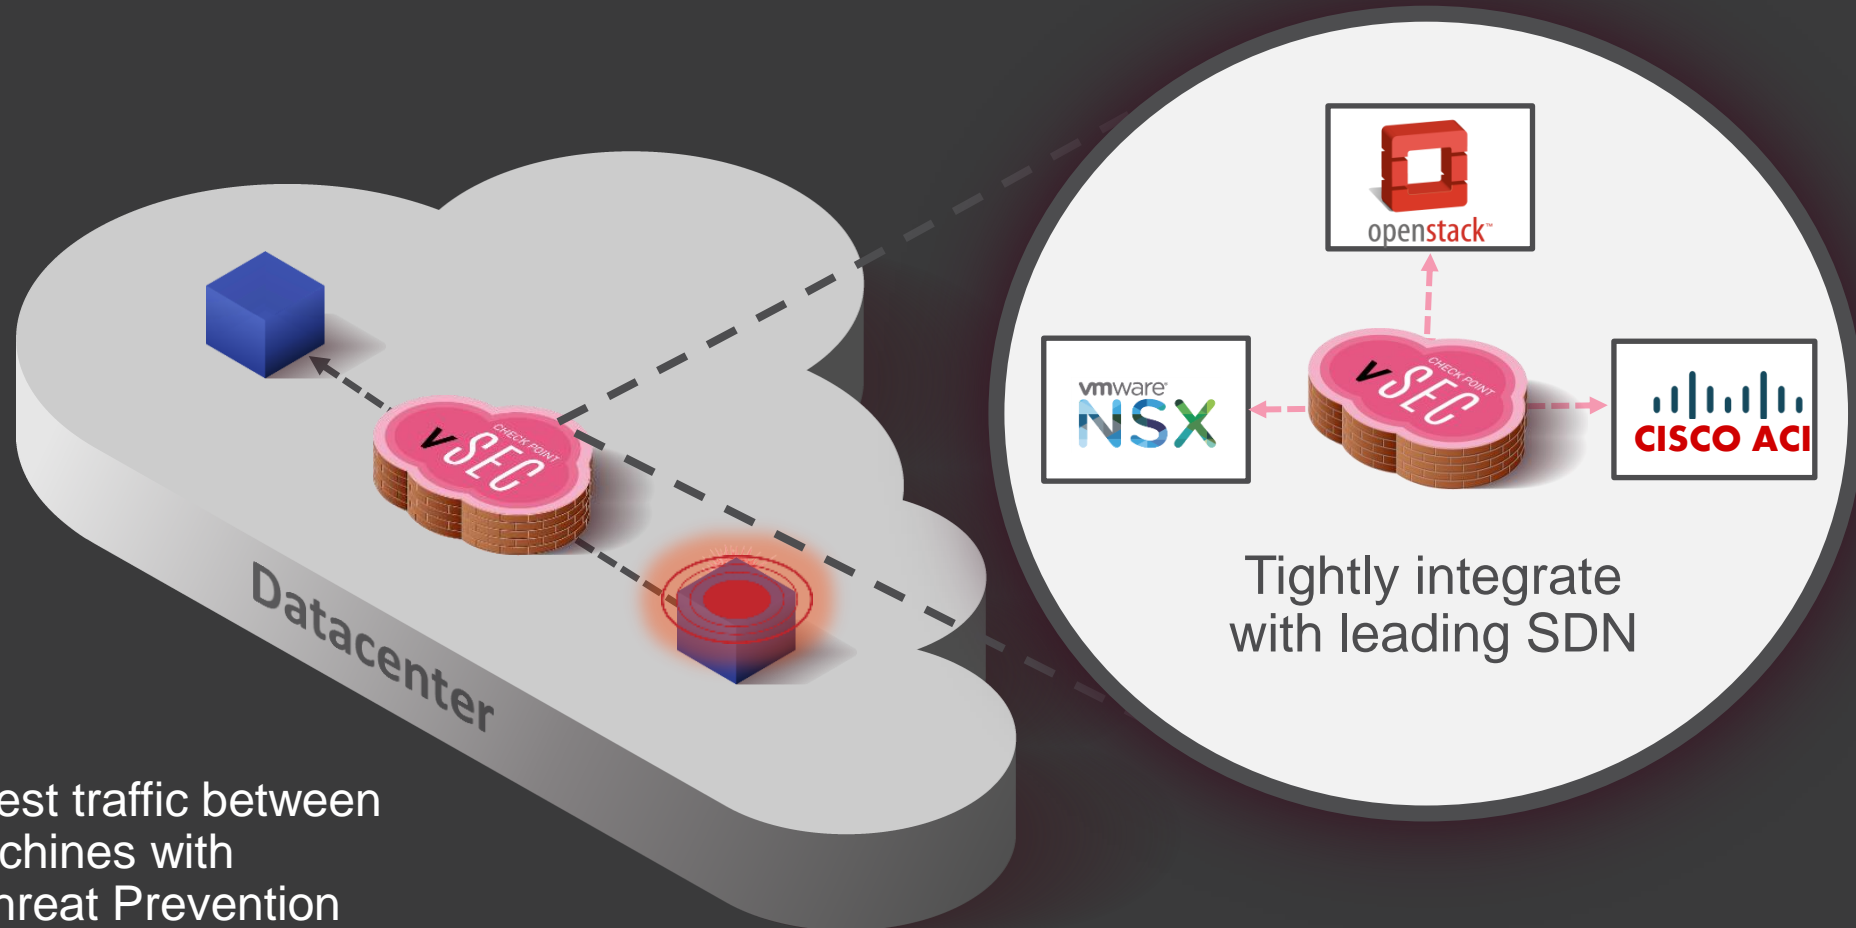

Check Point®
SOFTWARE TECHNOLOGIES LTD.

**vSEC SECURES YOUR APPLICATIONS
EVERYWHERE**

PREVENT LATERAL THREATS BETWEEN APPLICATIONS

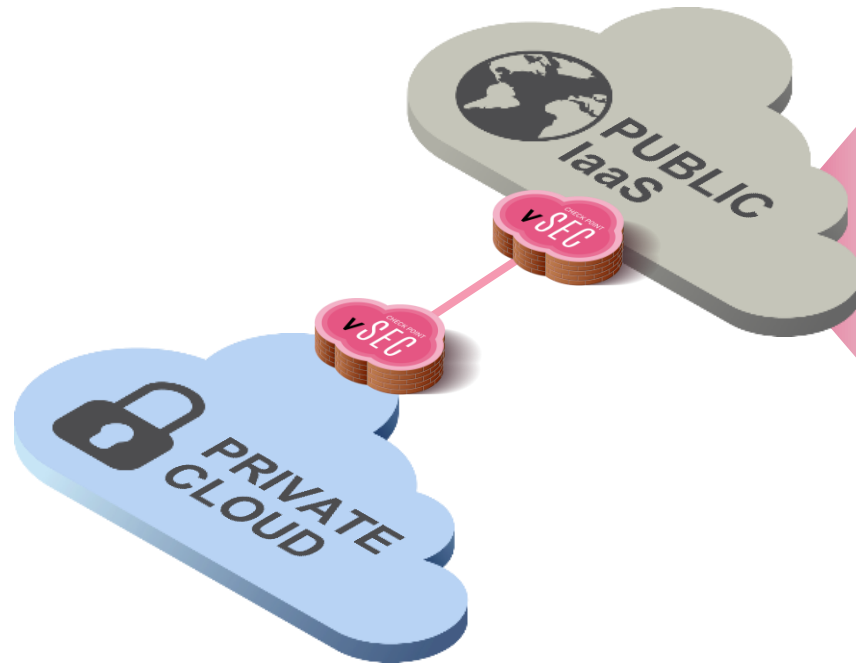

Check Point®
SOFTWARE TECHNOLOGIES LTD.

vSEC Inspects East-West traffic between
physical and virtual machines with
Sandblast Advanced Threat Prevention

SECURE YOUR APPLICATIONS IN THE HYBRID CLOUD

Extend your vSEC Security
to your Public IaaS

vSEC for AWS

vSEC for Azure

vSEC for vCloud Air

Check Point®
SOFTWARE TECHNOLOGIES LTD.

FROM WEEKS TO SECONDS WITH vSEC AUTOMATION

vSEC SECURITY AUTOMATION USE CASES

Check Point®
SOFTWARE TECHNOLOGIES LTD.

PERFORM THESE OPERATIONS...

Change application's networking

Scale up your application

Virtual Patching

Provision a new application

Connect a new IOT device

KNOWING THAT....

- Security is automatically provisioned
- Application is instantly secured
- Application admin never waits
- No tickets overhead
- Everything is auditable

CHANGE APPLICATION NETWORKING

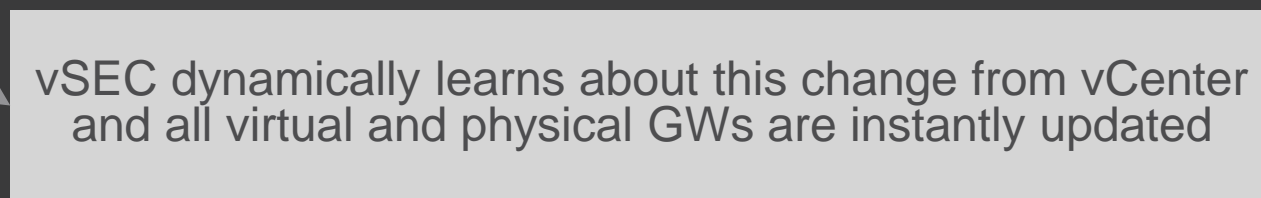

Check Point®
SOFTWARE TECHNOLOGIES LTD.

Legacy Way

Many Days / Manual process

Changing
Web VM IP

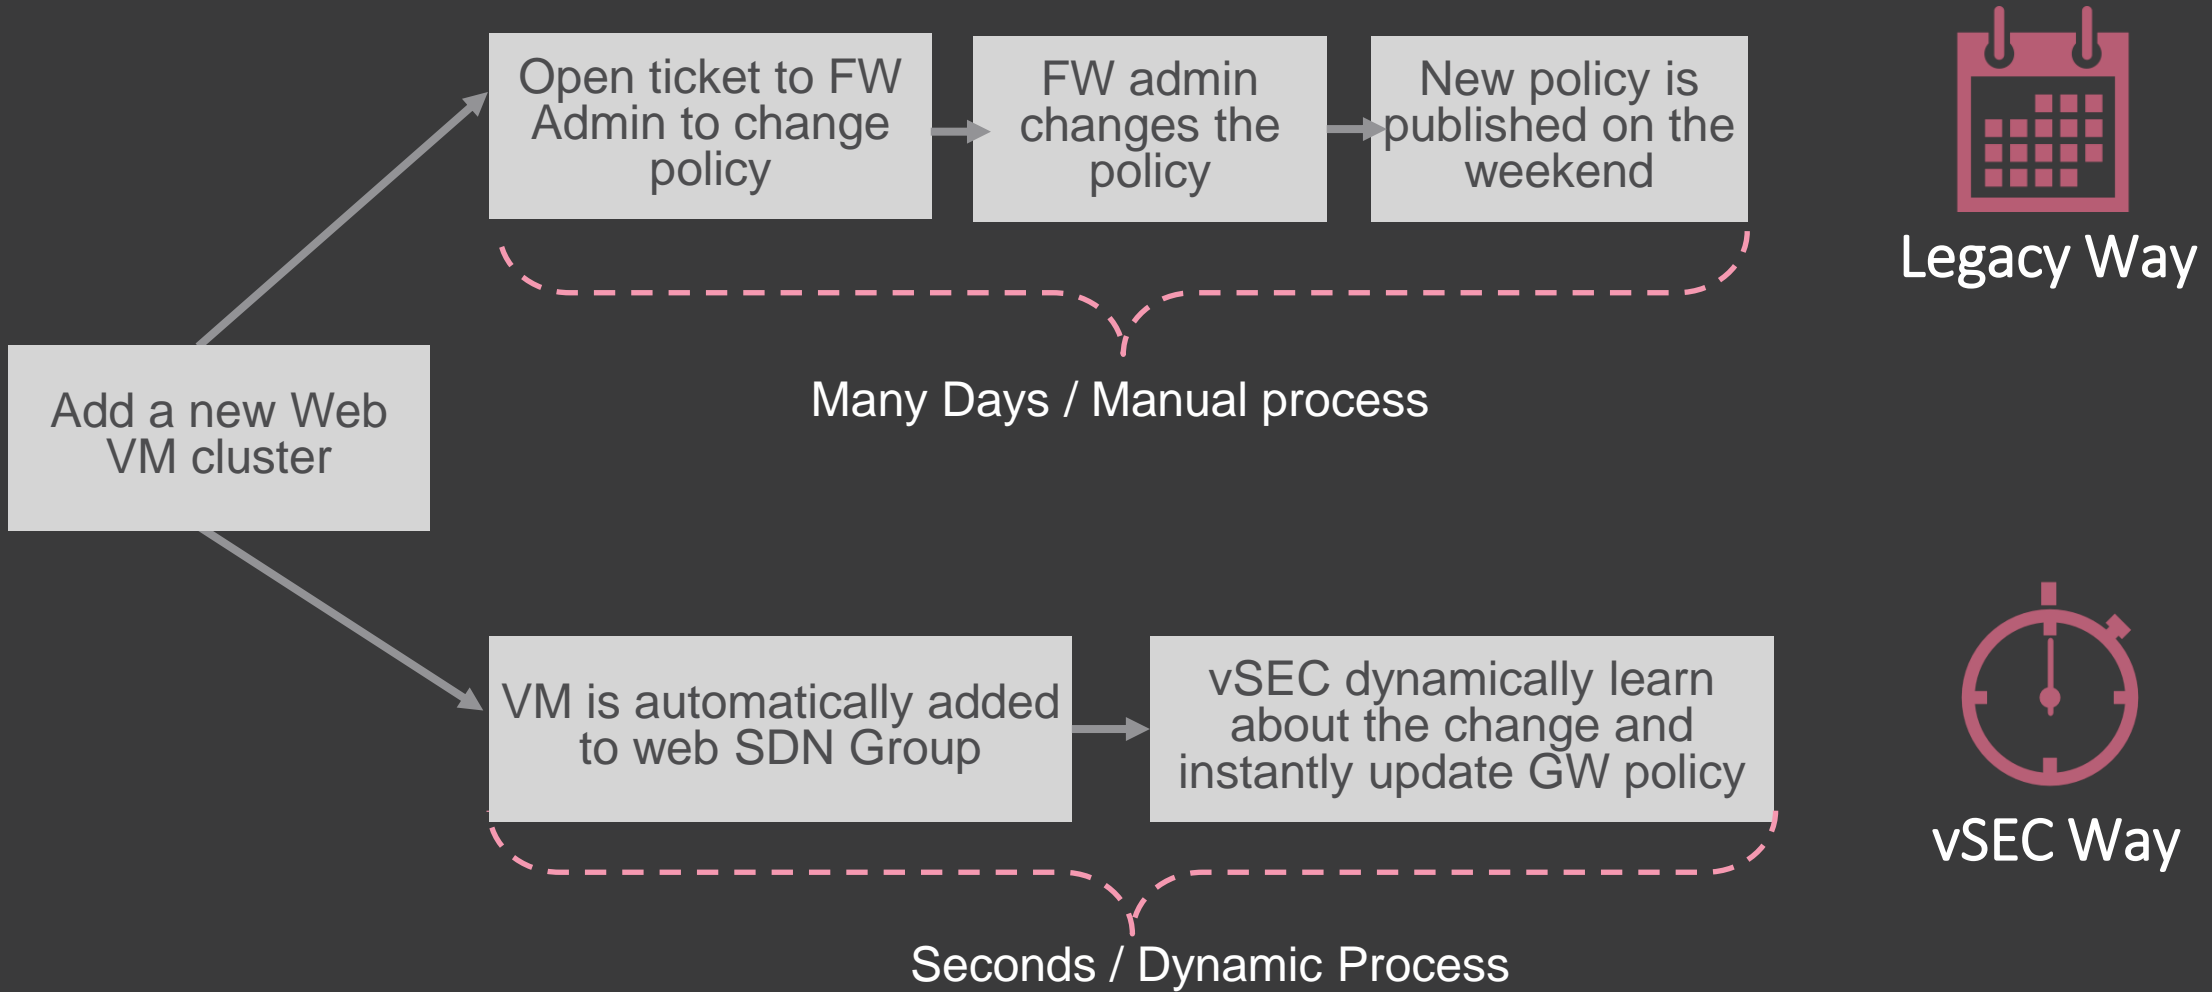

vSEC Way

Seconds / Dynamic Process

SCALE UP YOUR APPLICATION

Check Point®
SOFTWARE TECHNOLOGIES LTD.

VIRTUAL PATCHING

Check Point®
SOFTWARE TECHNOLOGIES LTD.

Legacy Way

It takes days to test, approve and deploy a new security patch

Meanwhile, vulnerability is known and applications are exposed

vSEC Way

Virtually patch your applications with vSEC IPS and advanced threat prevention before security patch is announced

PROVISION A NEW APPLICATION

Check Point[®]
SOFTWARE TECHNOLOGIES LTD.

Legacy Way

Develop a manual procedure
for new Database

Manually configure the FW to
secure the new Database

Many hours / Manual process

vSEC Way

Develop an orchestration recipe
for new Database with security

Recipe is executed and
provision the FW policy

Seconds / Automation Process

CONNECT A NEW IOT DEVICE

Check Point
SOFTWARE TECHNOLOGIES LTD.

Connect IOT
to the network

PrintersPortal

vSEC Portal for IOT Admin

Enter the new IOT name

Add

New rule is created
to IOT and all GWs are
instantly updated

vSEC Way

30 Secs Manual
(avoid open a ticket)

Seconds / Automation
Process

Check Point®
SOFTWARE TECHNOLOGIES LTD.

5 REASONS WHY vSEC R80 IS THE BEST SECURITY AUTOMATION SOLUTION

1st REASON

Check Point vSEC & R80

Trusted Policy Delegation

Scope automation privileges only to relevant application's rules

Other Vendors

Giving the keys for the kingdom

If you allow automation to change one rule, you allow it change any rule

2nd REASON

Check Point vSEC & R80

Simultaneous updates

Many automations can run simultaneously

Other Vendors

Entire Policy Lockdown

Only one automation can run at a time

3rd REASON

Check Point vSEC & R80

Dynamic Changes

Gateways policy dynamically learns about network changes of VMs & Applications

Other Vendors

Static Changes

Admin must manually update policy anytime VM networking is changed

4th REASON (roadmap)

Check Point vSEC & R80

Auto security service chaining

vSEC automatically configures SDN controller to chain security based on policy

Other Vendors

Manual security service chaining

SDN Admin must manually configure the controller policy to chain security

5th REASON (roadmap)

Check Point vSEC & R80

Application role Auto-Discovery

Admin is educated on what policy to apply between VMs

Other Vendors

Security role manual discovery

Admin is oblivious on what security policy to apply between VMs

Check Point®
SOFTWARE TECHNOLOGIES LTD.

**THE JOURNEY TO HYBRID CLOUD STARTED
BE RELEVANT
STAY COMPETITIVE**

HYBRID CLOUD & SDN TIPPING POINT (July 2016)

AZURE 120K New customers/month	VMware NSX 100+ Customers spent over \$1M on NSX	Cisco ACI 7200+ ACI-ready customers
--	--	---

Enterprise Public Cloud Adoption

% of Respondents Running Applications

THE EFFORT OF HYBRID CLOUD

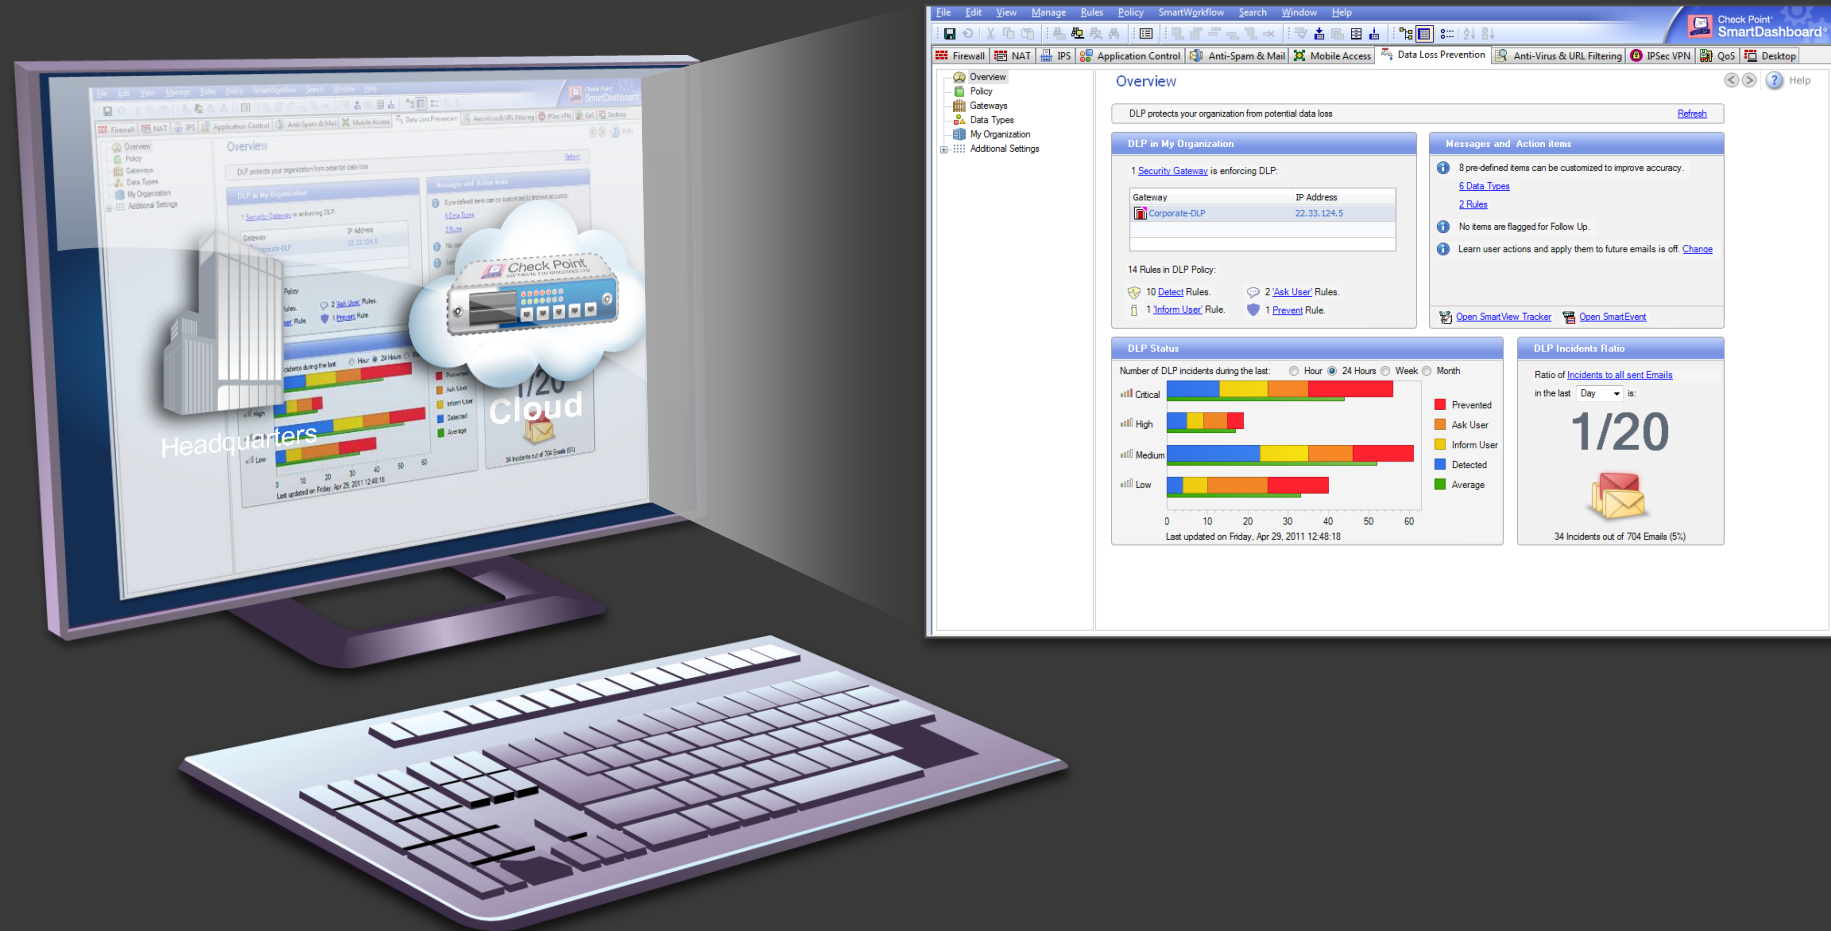

**MOVING TO CLOUD IS A STRATEGIC MOVE
IT TAKES TIME AND EFFORT TO REALIZE THE FULL POTENTIAL**

Unified Management with Single Console

Check Point®
SOFTWARE TECHNOLOGIES LTD.

Manage Cloud and On-Premise Security from a Single Console

Check Point vSEC
Integrates with
Azure Security Center

Azure Security Center integrates with Check Point

Security Center discovers deployments which benefit from vSEC deployments

Check Point's vSEC through Azure Security Center:

- **Simplified Deployment - just few clicks**
- **Integrates Check Point's logs in Security Center alerts dashboard**

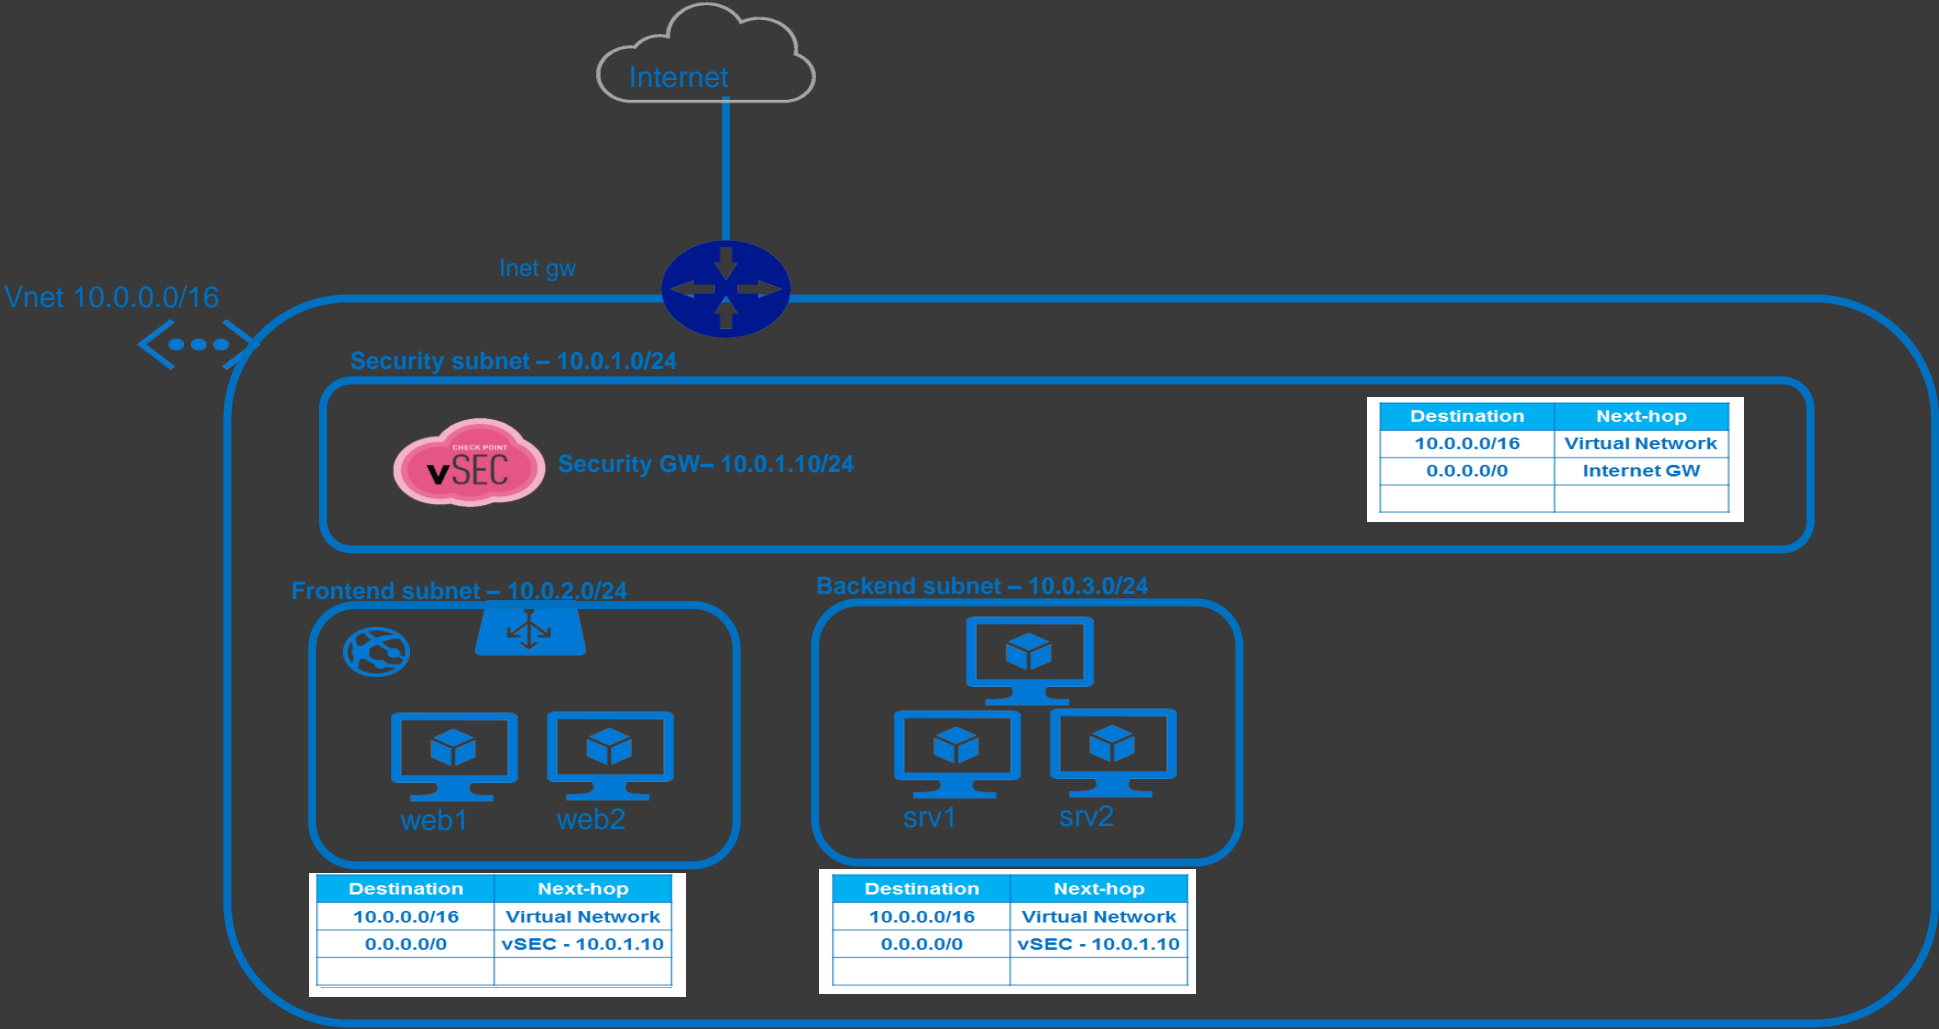

Check Point
SOFTWARE TECHNOLOGIES LTD.

USE CASE – Change your Mind !

... From limitation to advantage

North -South Service Insertion

Implementation CPX-Mgmt #1

Check Point®
SOFTWARE TECHNOLOGIES LTD.

- Setup of R80 Mgmt
- adding Log-Server Object with public IP
- activate SmartEvent Server
- create new gw Object, change Log-Srv
- create sample ruleset – 4 Rules (Stealth, Frontend/Backend and Cleanup)

Implementation CPX-Mgmt #2

Check Point®
SOFTWARE TECHNOLOGIES LTD.

- config of NAT (hide NAT + static for HTTP)
- verify logging and NAT

Implementation CPX-NET #1

- Setup R77.30 vSec gw in Azure
 - disable NSG
 - configure basic vnet and secure subnet
- run initial wizard in order to setup SIC
- config of new subnets
 - Frontend
 - Backend
- config of new UDR's
 - Frontend
 - Backend
 - Secure (linked to the vSec NIC)

Implementation CPX-NET #2

Check Point®
SOFTWARE TECHNOLOGIES LTD.

- verify access to gw
- activate IP forwarding for gw's nic in Azure
- install 2x centos vm's (for frontend + backend services)
 - without public IP
 - without NSG

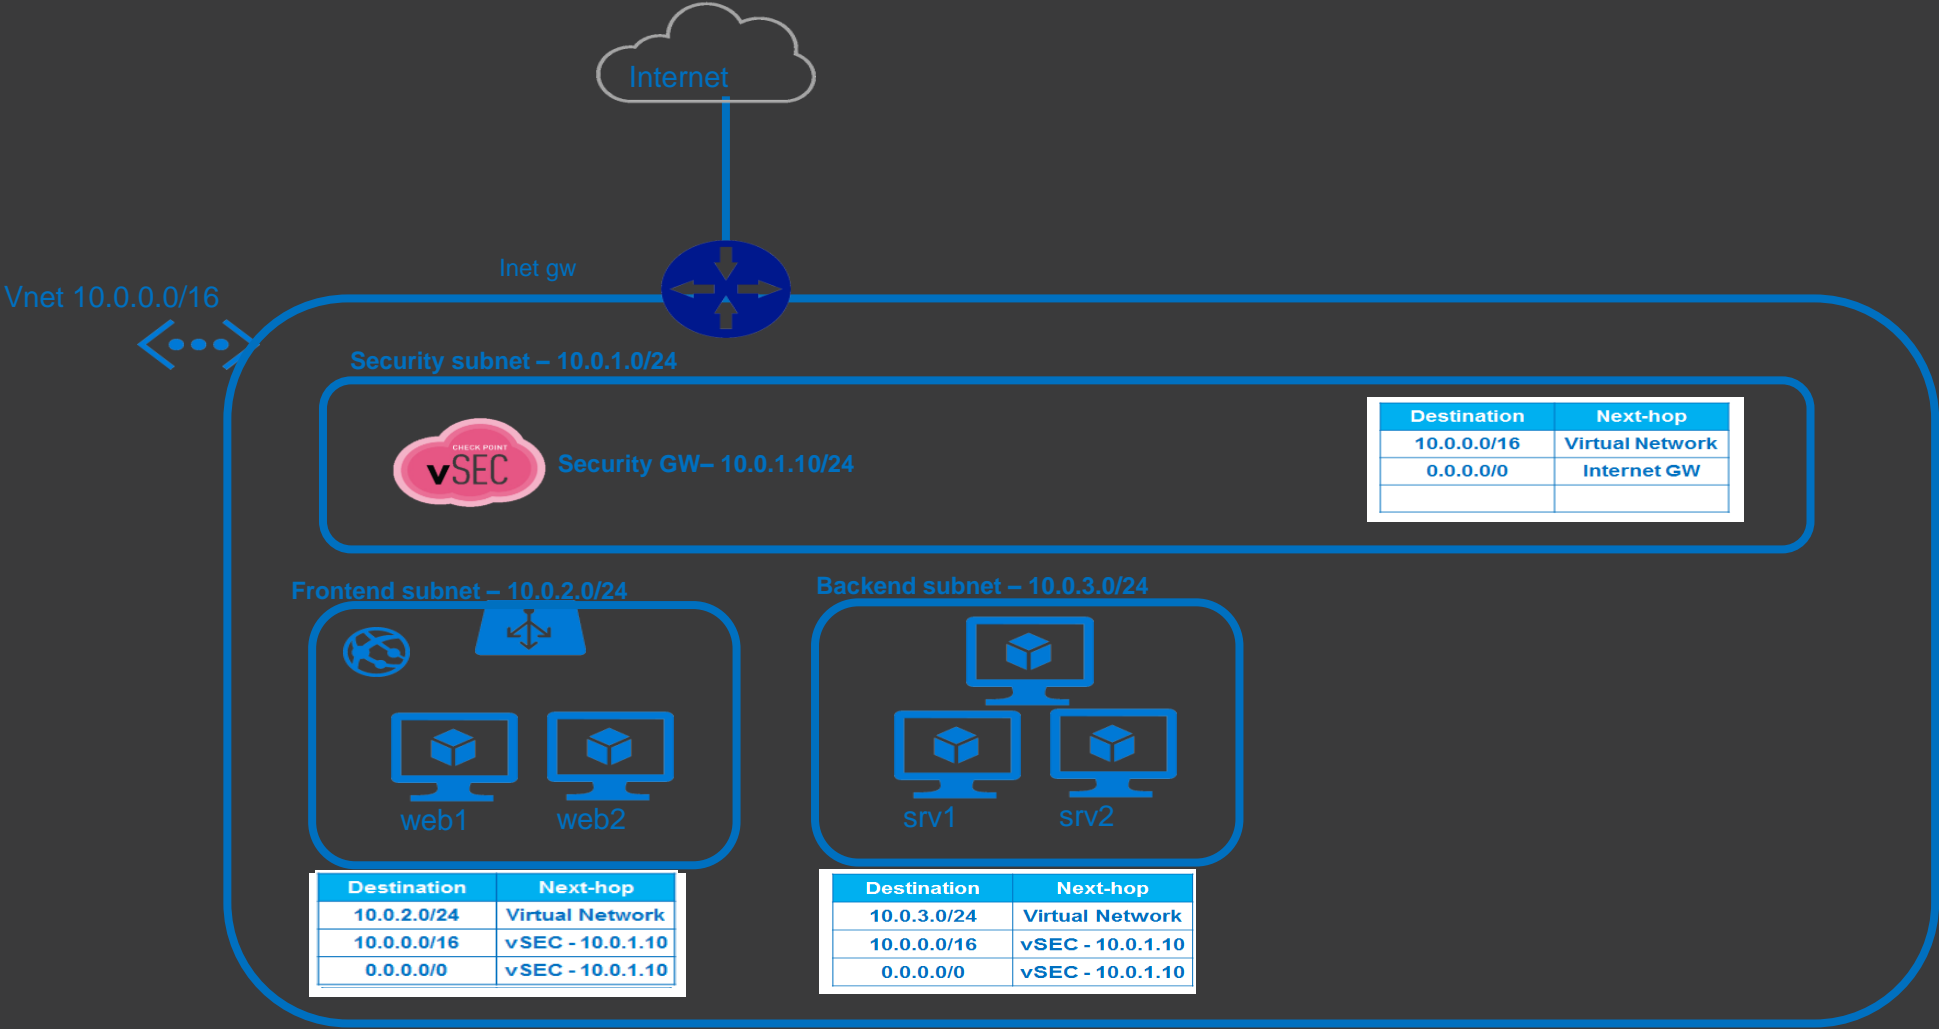

Implementation CPX-NET #3

Check Point®
SOFTWARE TECHNOLOGIES LTD.

- ssh login to gw – verify connectivity of centos vm's in frontend and backend subnet
- ping gateway (verify result)
- ping frontend to backend (verify result)
- ping internet (verify result)
- install httpd on frontend machine
- check access from outside to web server

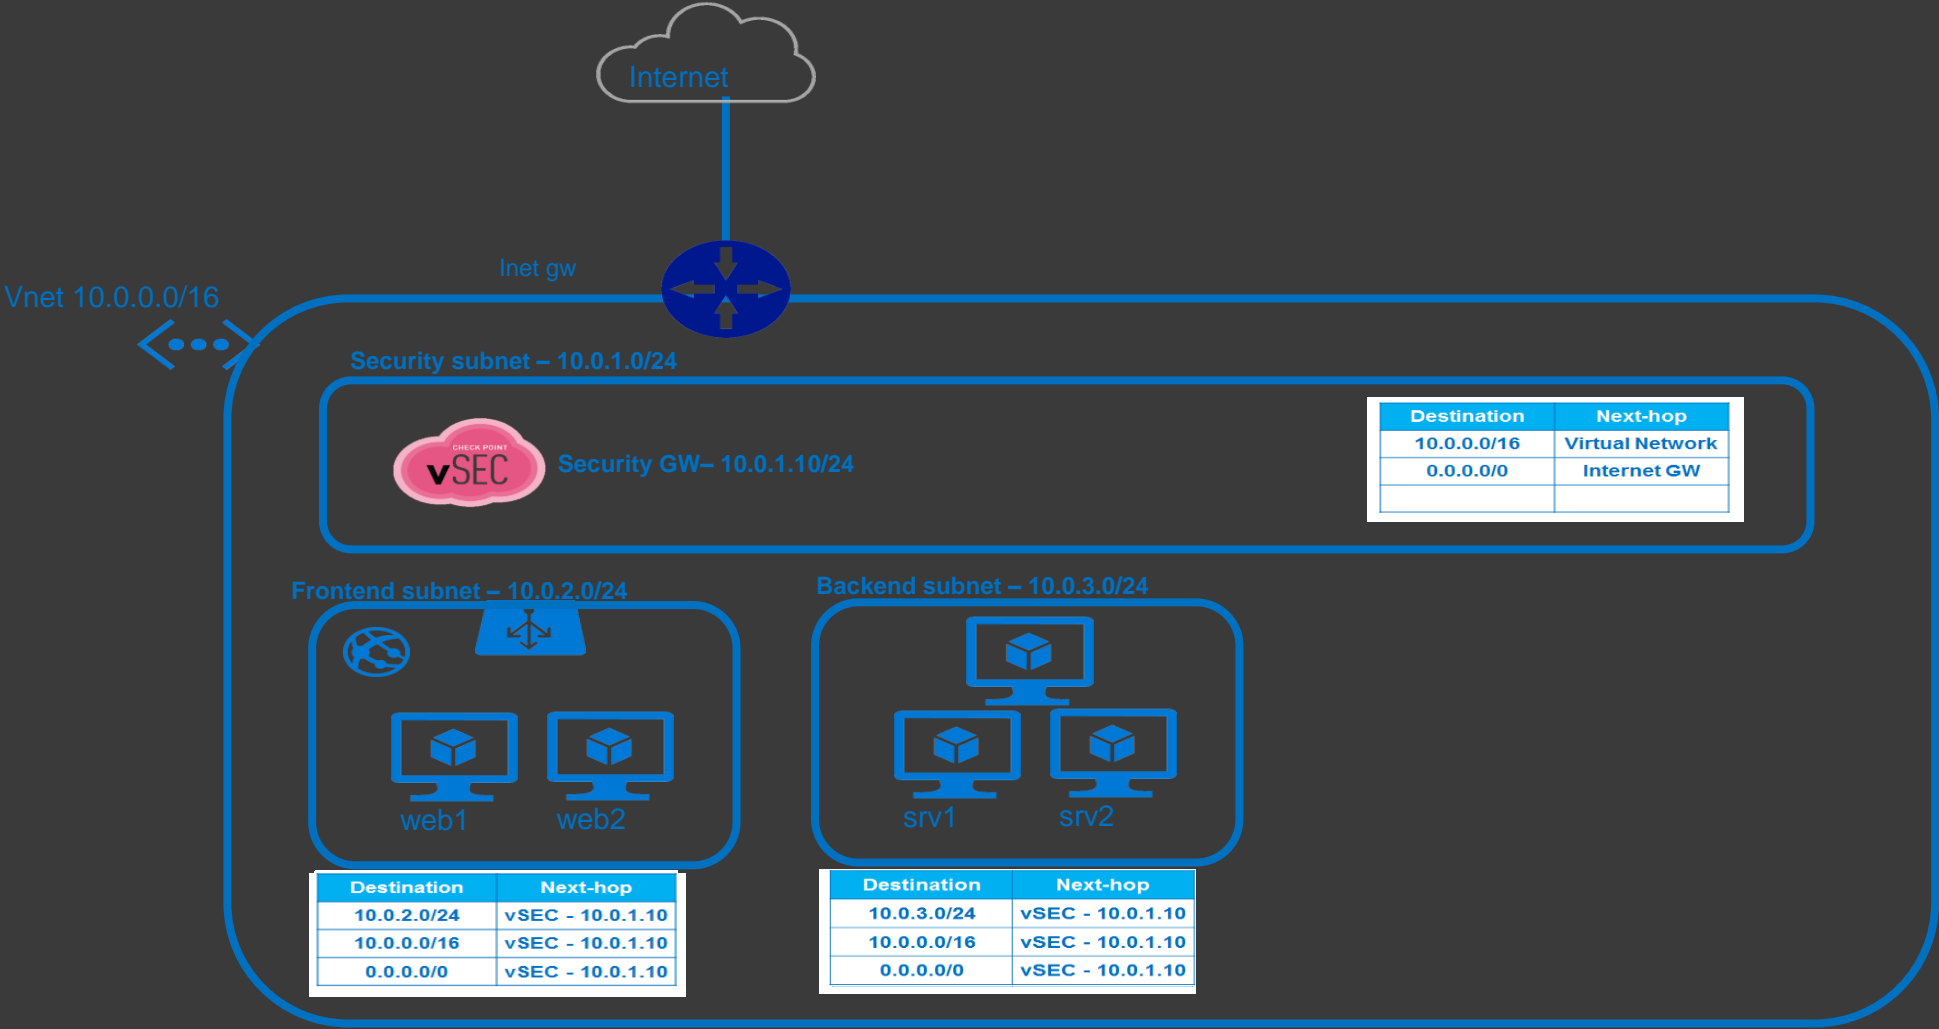

East – West Service Insertion

from NFV to East-West Security & 1SA

- change UDR's in order to route traffic via vSec Azure gw
- verify logging – check rules

VM-to-VM Service Insertion

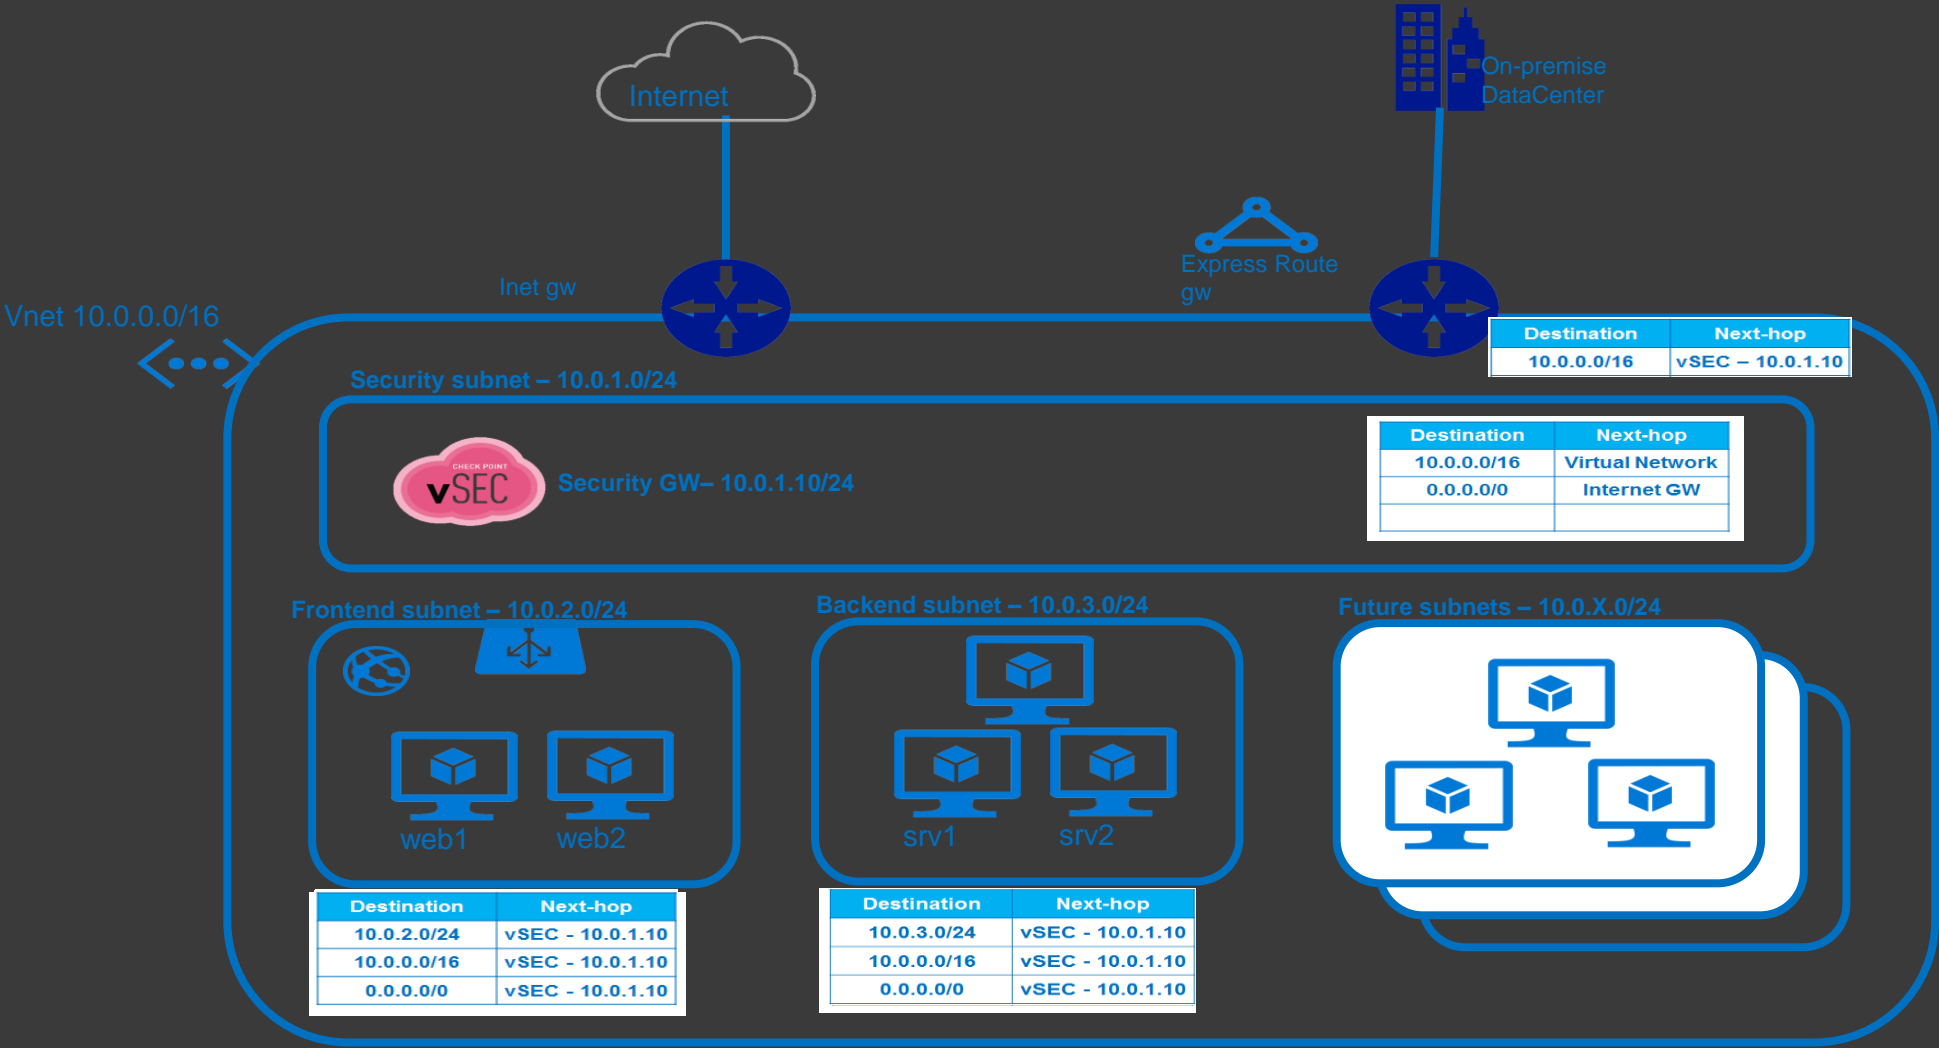

Activation of more security features

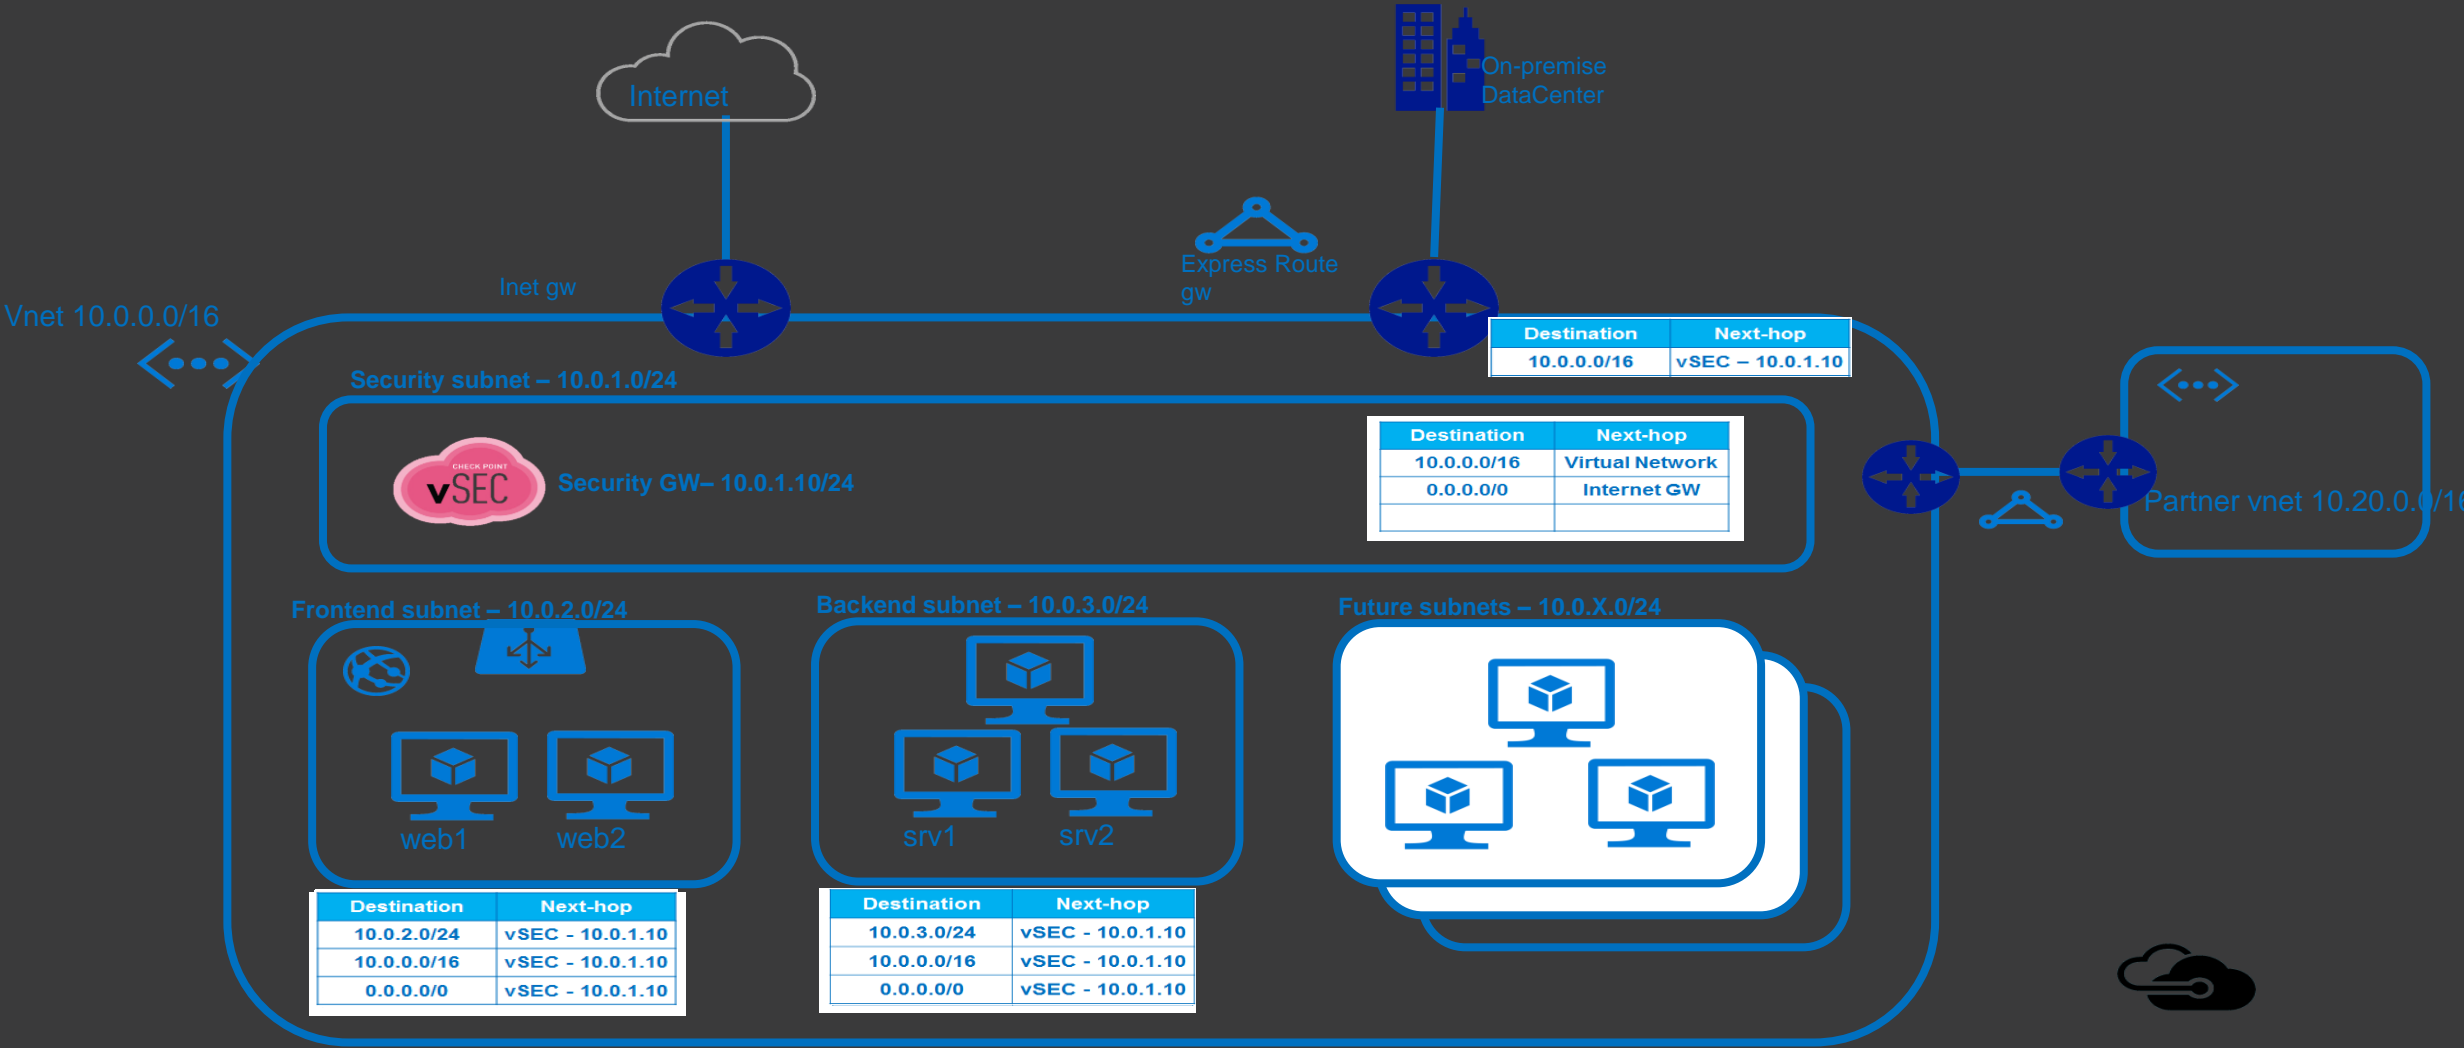

Check Point®
SOFTWARE TECHNOLOGIES LTD.

- activate more blades
- config of application control policy in order to log only and accept
- run demos (external access via http) – verify log entries and smart event

On-premise Connection

VNet-to-VNet Connection

Check Point
SOFTWARE TECHNOLOGIES LTD.

Deployment Methods

Deployment Methods

Check Point®
SOFTWARE TECHNOLOGIES LTD.

Azure Portal – Build, manage, and monitor everything from simple web Apps to complex cloud applications in a single, unified console

Azure Resource Manager (ARM) - enables you to deploy, update or delete all of the resources for your solution in a single, coordinated operation. You use a template for deployment

Azure Powershell - powerful scripting environment that you can use to control and automate the deployment and management of your workloads in Azure.

Check Point
SOFTWARE TECHNOLOGIES LTD.

SUMMARY

MICROSOFT AZURE

- Highest level of Security Partner
- The only NGFW solution in Azure Security Center
- Automated solution to simplify deployments

Check Point®
SOFTWARE TECHNOLOGIES LTD.

vSEC SECURES THE FUTURE DATACENTER TODAY

vSEC SOLUTIONS & PRODUCTS

vSEC for Private Cloud with SDN

vSEC for NSX

vSEC for ACI

vSEC for Virtual-Datacenter

vSEC Virtual Edition
(also known as VE)

vSEC for OpenStack

vSEC for Public IaaS

vSEC for AWS

vSEC for AZURE

vSEC for vCloud Air
